EDUCATION

Mahindra University

Bachelor of Technology in Artificial Intelligence

Hyderabad, IN

Aug. 2023 – Present

EXPERIENCE

Software Development Intern - Reddys Digital

Reddys Digital Pvt. Ltd.

Jun. 2025 – Aug. 2025

Hyderabad, IN

- Developed frontend modules using **Next.js**, **TypeScript**, **Tailwind CSS**, and **Framer Motion**.
- Built reusable components and improved **responsiveness and performance**.

PROJECTS

MCSE — Stock Trading Simulator | *Next.js, Convex, TypeScript, PowerShell*

Mar. 2026

- Designed a **20+ page** real-time trading platform spanning order execution, portfolios, screeners, watchlists, and IPO workflows.
- Supported **400+ participants** and **250+ concurrent users** with synchronized market state across PWA and Android TWA clients.
- Automated Android releases with **PowerShell**, validating dependencies, manifests, signing, and build artifacts.

COBOL Archaeologist — Compliance Drift Detection | *Python, Tree-sitter, RAG, Bash*

Aug. 2026

- Engineered a **Python/Tree-sitter and RAG pipeline** for line-grounded compliance analysis across legacy COBOL banking systems.
- Created a **605-row benchmark** and **800+ Pytest cases** spanning retrieval, verification, data processing, and **11 MCP tools**.
- Implemented call graphs, interprocedural data-flow slicing, and **Bash automation** for compiler setup and reproducible UNIX workflows.

Lost in Space — Satellite Planning Console | *FastAPI, React, NumPy, Pytest*

Jul. 2026

- Built a FastAPI/React satellite planning console with **7 REST endpoints** and an end-to-end plan, validate, and simulate workflow.
- Developed a **two-pass constraint-based scheduler** for tile access, slew timing, attitude trajectories, imaging coverage, and scoring.
- Validated mission behavior with **14 Pytest cases** and visualized coverage maps, score cards, timelines, and frame-level results.

LightsOut — F1 Prediction Platform | *Python, FastAPI, LightGBM, React*

Jul. 2026

- Trained **3 LightGBM quantile-model bundles** on **7,072 records** from **176 races** to predict finishing positions and pole sitters.
- Served **10,000-run Monte Carlo** win, podium, and points forecasts through **8 FastAPI endpoints**.

Proctor — Technical Interview Platform | *Next.js, TypeScript, Web APIs, CodeMirror*

Sep. 2026

- Built a **seven-stage interview flow** with media capture, timed responses, coding, explanations, and recovery.
- Built a **14-language** CodeMirror workspace with autosaved drafts, keyboard support, and accessible updates.

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, SQL, Dart, HTML, CSS

Frameworks & Libraries: Next.js, React, Django, Tailwind CSS, Flutter

Developer & Design Tools: Git, GitHub Actions, Postman, VS Code, Figma, Adobe Creative Suite

Platforms: Firebase, Supabase, MongoDB, Vercel

EXTRACURRICULARS/ACTIVITIES

Head of Tech & Design — Mathematics Society

Built and maintained the club website, designed event collateral, and led a tech event for 400+ participants.

Aug. 2025 – Jun. 2026

Representative of Design — AEON 2026 Tech Fest

Dec. 2025 – May 2026

Representative of Design — MasterShot

Jun. 2025 – May 2026
